

LEECHPOOLCATERPILLAR NURSERY & AFTER-SCHOOL CLUB

SUN PROTECTION POLICY

AIM

It is important to Leechpool Caterpillar Nursery & After School Club that we take every precaution to ensure that each child within our setting is protected from discomfort and sun damage of any form.

TO ENSURE THAT

- No child is over exposed to direct or dangerous amounts of UVA.
- All children are kept hydrated and cool and have shade available to them.
- Parents/carers are aware of the importance of applying sunscreen before arriving for session.
- Caterpillar Nursery keep a bottle of '**Boots Soltan 50+**' sun cream on site and will be used if a child does not have any of their own. Permission to apply this is asked for in advance. Parents are to provide a named sun cream for staff to apply for their child if attending all day sessions. This suncream is available for After School Children if required and with written permission prior.
- After School children are to bring a named bottle of suncream with them to each session they attend and are to apply this themselves before we go outside as per the Leechpool Primary School Sun Protection Policy.
- Parents and carers are aware that each child should bring a named sun hat in their bag to every session, regardless of the weather at the time of arrival.
